Your K-30 Sensor unit comes with 4 configurable outputs, shown on the left. We can custom configure them per your request before the product is shipped to you. This is helpful for applications operating within a specific range of CO2 levels and for interfacing with custom controllers. Just click and type in the fields below to fill out the form.

ABC:            Enabled     Disabled

**NOTE: Default Output 1: 0-4V=0-2,000ppm, Max Output 1: 0-10V=0-10,000ppm. Accuracy specified for 0-5,000ppm or lower only. See manual for other output configurations. Enter all CO2 values in ppm.**
